## Release Summary

Keyedin Projects v7.2.4 is a scheduled maintenance update release with general support fixes and minor data view enhancements.

Customers will be notified separately via our internal Support process (Freshdesk) for any of their tickets that have now been resolved in this Release.

## Important Information for Single Sign On (SSO) Customers

We would like to take this opportunity to inform customers using SSO that a future Product enhancement (date to be confirmed) will provide in-application service announcements for greater visibility of release information and links to supporting documentation.

In the meantime, and as an **optional alternative** to the existing URL you may be using to access Keyedin Projects, the following landing page URLs can be bookmarked (based on your region), which will display the same service announcements accessible on the standard login page.

No changes to system configuration are required, and your existing login method will remain unaffected if you would prefer to continue using that.
