Release Summary

KeyedIn Enterprise v7.4.3 is a scheduled maintenance update release with general support fixes and an enhancement to the Project Snapshot functionality to include Risks and Issues data.
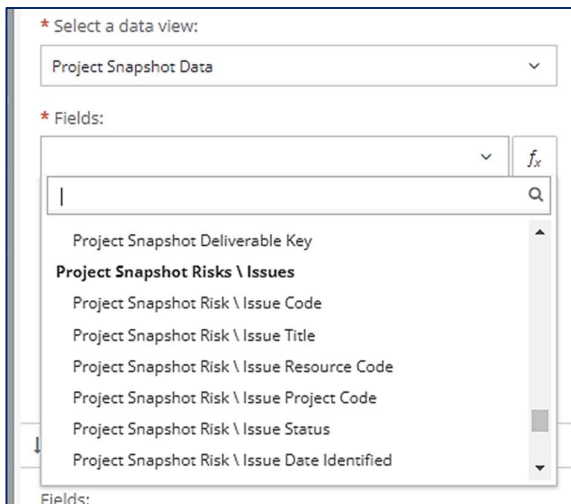

Customers will be notified separately via our internal Support process (Freshdesk) for any of their tickets that have now been resolved in this Release.

Inclusion of Risks and Issues data in Project Snapshots

When creating a Project Snapshot (either manually or a scheduled job) any Risks or Issues recorded on Projects at or below the specified snapshot level will now be included in the snapshot data.

Please note that Risks and Issues included in a snapshot can not be deleted from the system, only *Closed*.

The Project Snapshot data view has been updated to include this additional data in the new Risks/Issues section, where the *Type* field can be used to differentiate between the two.

The updated data view is available on request from Support.

Data View Changes

The following **new** data views are available with this release:

Data View	Description
Skill Demand and Capability Monthly v7.0.0	New data view to be able to report on skills demand against capacity, by month
Skill Demand and Capability Weekly V7.0.0	New data view to be able to report on skills demand against capacity, by week
Planning General Including Draft v7.0.0	New data view to be able to report on draft task plans

The following data view changes have been made for this release:

Data View	New Fields
Timesheet General v6.0.12	Added *Task Is Deleted* field
Project Snapshot v6.0.6	Added *Risks/Issues* section

Data view changes are optional. Please contact Support for installation guidance as required.
