Release Summary

KeyedIn Enterprise v7.6.1 is a scheduled maintenance update release with general support fixes and minor feature enhancements. Enhancements include the redirection of SSO users to the SSO login page upon logout/timeout and the reintroduction of hyperlinks to system reports.

***Note, the asynchronous dashboard changes previously mentioned in the 7.6 release guide will now be delivered in our 7.6.2 release due in the new year.**

Customers will be notified separately via our internal Support process (Freshdesk) for any of their tickets that have now been resolved in this Release.
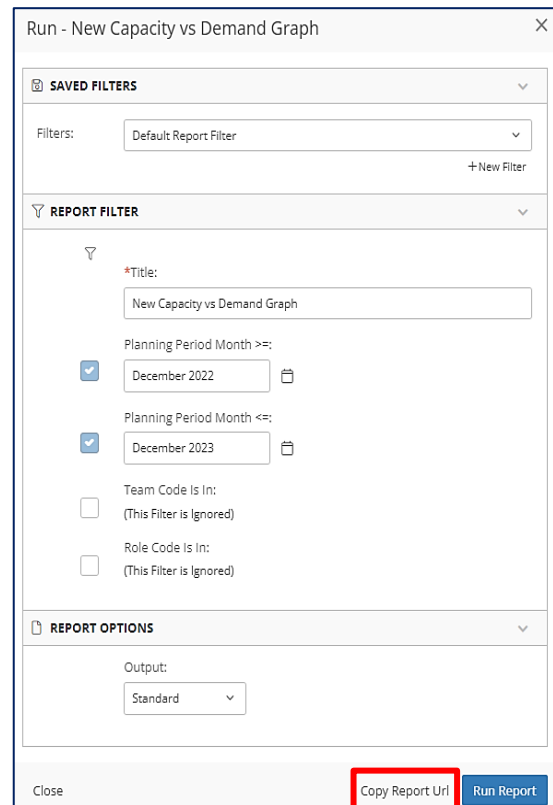

Redirect SSO Users to the SSO Login Page

SSO users will now be redirected to the SSO login page following a session timeout or when choosing to log out.

Ability to hyperlink to system reports

A new option has been introduced on the Report Run Screen to 'Copy Report Url'. The Url can then be shared with other users and, provided they are logged in to the system, will be directed to the report's run screen, subject to report access permissions.

Data View Changes

The following data view changes have been made for this release:

Data View	New Fields
Forecast Demand Only Data v6.0.21	Resource Location

Data view changes are optional. Please contact Support for installation guidance as required.
